canva

PROJECTS

College Event & Registration Management System

- Developed a web application for managing college events, workshops, seminars, and student registrations.
- Implemented event creation, student registration, participant management, and event status tracking.
- Used React.js, Node.js, Express.js, and MySQL for application development.
- Designed a responsive interface using Bootstrap.
- Helps students register for events easily and allows organizers to manage participants efficiently.

Personal Expense Trace

- Developed a web-based application to track daily income and expenses.
- Implemented features to add, edit, delete, and categorize transactions.
- Built the application using React.js, Node.js, Express.js, and MySQL.
- Added expense summaries to help users monitor spending and manage budgets.
